

Shop of eye trainers- Customer

Login

The first page with Greeting
"Welcome to shop of eye trainers"
and current time
"Today Sat Feb 13 19:57:44 MSK 2021"
and two hyperlinks

The **Login** state has actions defined for both the **Entry** and **Exit** events, that show and hide the Login dialog respectively.

The button on the Login dialog, sends the **Login** signal, with parameters assigned from the contents of the dialog's input fields

Guard conditions are used on the transitions exiting this choice node, to determine which path is followed.
